HG natural stone bathroom cleaner

HG "natural stone bathroom cleaner" is a strongly concentrated cleaner for the safe and regular cleaning of marble and all other calciferous natural stone surfaces. This product effectively removes stubborn dirt such as soap residue, body fats and light deposits of limescale.

Directions:

For walls: Apply a few drops of this product to a damp (bathroom) sponge and clean the surface, then rinse or wipe off with a damp cloth.

For floors: Dissolve 50 ml (half a cup) in half a bucket (5L) of lukewarm water. Then clean the floor with a wrung-out mop or floor cloth, regularly rinsing it in the cleaning solution. Do not rinse or mop dry, simply leave the floor to dry on its own.

Caution: Transport and store the bottle upright. To protect bathrooms and shower partitions against moisture, dirt and stains, we advise the use of HG "natural stone protector" (HG product 35).

Medical personnel can request the data sheet via +31 (0)36 54 94 777.

The consumer's information sheet can be obtained via www.HG.eu
